Are your products RoHS compliant ??

Nemko offers several options for manufacturers and suppliers of electrical/electronic products to ensure and show that their products comply with the European RoHS Directive (2002/95/EC - Restricting the use of certain hazardous substances in electrical and electronic equipment), and equivalent requirements in other countries/regions:

RoHS Tested Certification

❑ **Attestation of <u>materials and components</u> based on verification through testing (including chemical analysis by advanced methods as ICP and GCMS).**
❑ **The certificate and mark will relate only to the 6 restricted substances.**
❑ **The applicable limits are the official Maximum Concentration Values.**
❑ **This includes quantitative testing and a material declaration will be provided detailing other substances and materials.**

RoHS Verified Certification

❑ **Attestation of <u>final products</u> (and components on request) based on check of technical documentation and verification through testing of "high risk" materials (including X-Ray screening).**
❑ **The certificate and mark will relate only to the 6 restricted substances.**
❑ **The applicable limits are the official Maximum Concentration Values.**
❑ **This is not a quantitative but rather a qualitative certification (go/ no go).**

Eco-design Verification

❑ **Specifically for IT-, audio/video-, household- and telecom <u>products</u>.**
❑ **Covers electrical- and magnetic field emission and radiation aspects, energy consumption and general environmental management as well as RoHS compliance.**
❑ **The applicable limits are based on internationally recognized state-of-the-art specifications and standards.**

RoHS Management Verification

❑ **For manufacturers of any electrical/electronic product and suppliers of materials and components for such product.**
❑ **Review the <u>management program</u> made to ensure RoHS compliance and audit the effectiveness of the relevant processes.**
❑ **Offered as an independent service and attestation based on IEC QC 080000, or offered complementary/supplementary to basic system audits to ISO 9000/14000.**
